Amyotrophic Lateral Sclerosis (ALS) Continuing Education Module

Free Continuing Education on ALS

What is the ALS Continuing Education Module?

The Agency for Toxic Substances and Disease Registry (ATSDR) invites you to learn about the new Amyotrophic Lateral Sclerosis (ALS) Continuing Education Module. This module is provided as part of the National ALS Registry and was developed for physicians as well as other health professionals who want to learn more about ALS and the new National ALS Registry.

The ALS Continuing Education Module offers:

- Free continuing education credits (1.5 contact hours)
- Convenient online training
- Peer-reviewed, up-to-date content

The ALS Continuing Education Module provides:

- A clinical overview of ALS
- Current clinical practice recommendations for diagnosis, treatment, and management of patients with ALS, including communication strategies
- Information on the importance of standard diagnostic coding procedures for ALS patients in clinical practice
- Information on the new National ALS Registry and the importance of ALS patient self enrollment in the registry

For information regarding the ALS Online Continuing Education Module, please visit http://www.atsdr.cdc.gov/emes/ALS/training/index.html

For information regarding the National ALS Registry, please visit http://www.cdc.gov/als/

ATSDR has a large suite of products for health professionals that offer free continuing education. To learn more, please visit http://www.atsdr.cdc.gov/emes/topics/index.html.
