Which data should be reported to ArboNET versus MosquitoNET?

ArboNET: Continue to report county level data for virus infection in mosquito pools.

MosquitoNET: Report detailed mosquito data by location and insecticide resistance testing results to MosquitoNET.

What is the difference between a Jurisdiction Level User and a State Level User?

Jurisdiction Level User

User will be able to either enter data directly through the interactive MosquitoNET site or upload data using the spreadsheet available through MosquitoNET. Users will be able to view, edit, and delete data for their jurisdiction only. Users will be able to export all data in MosquitoNET except location information outside their jurisdiction.

State Level User

User will be able to export data from MosquitoNET except location information outside their state. Users will not be able to enter, edit, or delete jurisdiction-level data. Location information within the state (Latitude/Longitude and Address) will only be available for the individual jurisdiction and state.

What should states consider when establishing jurisdictions?

- Each state must determine how it wants to manage data reporting to MosquitoNET. Jurisdictions may, for instance, be established at a county or vector control unit level, or as determined by the state.
- However, please note: Once the state has established a list of Jurisdiction Level Users, splitting an existing jurisdiction into multiple jurisdictions will not be allowed. This helps to maintain data integrity.

What are the options for entering MosquitoNET data?

1. **State reports all data to MosquitoNET (Register as a Jurisdiction Level User)**

Last updated: Dec. 2, 2016

- The state will report all data from within the state to MosquitoNET.
- The state will determine how it wishes to collect data from local jurisdictions.
- The state is solely responsible for reporting data collected to MosquitoNET via an established Jurisdiction Level User account.

2. State and Jurisdiction Level Users report data to MosquitoNET (State and Jurisdictions will register as a Jurisdiction Level Users)

- The state is responsible for establishing jurisdictions within the state.
- Each Jurisdiction Level User will be responsible for reporting data within the jurisdiction.
- If the state will be entering data on behalf of a jurisdiction, it needs to register as a Jurisdiction Level User.

How can I update my account?

- Send an email to mosquito@cdc.gov.
