

**Centers for Disease Control and Prevention
Fiscal Year 2014 Grants Profile Report for
Projects Funded through the Prevention and Public Health Fund**

The Centers for Disease Control and Prevention's (CDC's) Grant Funding Profiles tool (<http://www.cdc.gov/FundingProfiles/FundingProfilesRIA/>) provides quick access to information on CDC funding provided to recipients in states, the District of Columbia, and territories. The following is a summary of the projects funded through the Prevention and Public Health Fund (PPHF); this data was pulled from and can be accessed in the tool's fiscal year 2014 (FY14) dataset and jurisdictional summaries. The data include only funds awarded (i.e., obligated) through grants and cooperative agreements in FY14 (10/1/13 to 9/30/14). The "funding category" and "funding subcategory" fields in the table list the CDC budget line used to make the investment. More information on the parameters for selecting and categorizing funding tool data are available in the tool's [About the Data](#) document. Because some of CDC's funding opportunity announcements (FOAs) cover a total project period greater than one year, the titles of FOAs in this table may reflect the date the FOA was first published; however, the funding totals, as previously described, include only the portion of funding provided in FY14.
