## NATIONAL HEALTH AND NUTRITION EXAMINATION SURVEY (NHANES)

Consent for Specimen Storage and Continuing Studies Using DNA

Print name of participant	
First Middle	Last
Q Why will a sample of my DNA be kept for future hea studies?  A Genes are the "instruction book" for people. Genes are rout of DNA. The DNA of a person is about 99.9% the same as DNA of another person, but no two people have the same DNA except identical twins. Differences in DNA are called genetic variations and explain differences such as eye color and partly	discuss that any person is part of this survey under penalty of Federal laws: Section 308(d) of the Public Health Service Act (42 made USC 242m), the Privacy Act of 1974 (5 USC 552A), and the Confidential Information Protection and Statistical Efficiency Act
explain why some people get certain diseases. To look at these	Q Will I receive results from any future testing of my
variations many genetic tests may be done on your blood samp	le. specimens?
We will keep the DNA for an unlimited time. Studies of huma genes are helping us learn about many diseases and health conditions. The information from people who are part of NHA could help that effort.	A The NHANES program will not contact you or your family with results from these future studies. We will describe the completed studies on our website. If you are interested in your
We will store part of the blood sample that we collect in the excenter for future genetic studies. These samples will be frozen kept in a specimen bank for as long as they last. Your participations of the sample studies in the excent of the sample	and available.
is voluntary and no loss of benefits will result if you refuse.	${\it Q}$ What are the benefits and risks for giving a blood sample for future genetic studies?
Q What genetic studies will be done with the samples?	A You will not directly benefit but these studies may
A Science and medicine are continually advancing. New to and new ways of looking at results will be developed in the fut We can't predict what test will be done or what the results will mean for your health	ure. giving a sample includes the minor risk associated with taking the
Q Who can use the stored DNA samples for further stu	
A Researchers from Federal agencies, universities, and othe scientific centers can submit proposals to use the stored specim. These proposals will be reviewed for scientific merit and then by a separate board that determines if the study propo is ethical. The NHANES program will always know which samples belong to you, but we will not give other researchers a information that could identify you.	nens. $Q$ How can I remove my DNA samples from the specimen bank?
We will keep strictly confidential all health data and samples the we collect in NHANES, as required by Federal law. By	hat
diseases.	mens may help find new ways to prevent, treat, and cure many
