

Nationally Notifiable Conditions, 2011

Categorized by Notification Category

IMMEDIATE, EXTREMELY URGENT: Call the CDC Emergency Operations Center (EOC) at 770.488.7100 within 4 hours of a case meeting the notification criteria, followed by submission of an electronic case notification to CDC by the next business day.

IMMEDIATE, URGENT: Call the CDC EOC at 770.488.7100 within 24 hours of a case meeting the notification criteria, followed by submission of an electronic case notification in next regularly scheduled electronic transmission.

STANDARD: Submit electronic case notification within the next reporting cycle.

*As of November 10, 2010, cholera was temporarily placed under immediate urgent notification protocol, as per CSTE Interim Cholera Position Statement <http://www.cste.org/dnn/LinkClick.aspx?fileticket=f2zWxZ%2bU2Z0%3d&tabid=36&mid=1496>. The interim position statement expired June 16, 2011.

Approved by CSTE: June 2010
Implemented: January 1, 2011
Updated: August 19, 2011

Condition	Cases Requiring Notification	Notification Timeliness
Anthrax <ul style="list-style-type: none"> - Source of infection not recognized - Recognized BT exposure/potential mass exposure - Serious illness of naturally-occurring anthrax 	Confirmed and probable cases	Immediate, extremely urgent
Botulism <ul style="list-style-type: none"> - Foodborne (except endemic to Alaska) - Intentional or suspected intentional release - Infant botulism (clusters or outbreaks) - Cases of unknown etiology/not meeting standard notification criteria 	All cases prior to classification	Immediate, extremely urgent
Plague <ul style="list-style-type: none"> - Suspected intentional release 	All cases prior to classification	Immediate, extremely urgent
Paralytic poliomyelitis	Confirmed cases	Immediate, extremely urgent
SARS-associated coronavirus	All cases prior to classification	Immediate, extremely urgent
Smallpox	Confirmed and probable cases	Immediate, extremely urgent
Tularemia <ul style="list-style-type: none"> - Suspected intentional release 	All cases prior to classification	Immediate, extremely urgent
Viral hemorrhagic fevers¹ <ul style="list-style-type: none"> - Suspected intentional 	Confirmed and suspected cases	Immediate, extremely urgent
Anthrax <ul style="list-style-type: none"> - Naturally-occurring or occupational, responding to treatment 	Confirmed and probable cases	Immediate, urgent
Brucellosis <ul style="list-style-type: none"> - Multiple cases, temporally/spatially clustered 	Confirmed and probable cases	Immediate, urgent
Diphtheria	All cases prior to classification	Immediate, urgent

Novel influenza A virus infection	Confirmed cases	Immediate, urgent
Measles	Confirmed cases	Immediate, urgent
Poliovirus infection, nonparalytic	Confirmed cases	Immediate, urgent
Rabies in a human	Confirmed cases	Immediate, urgent
Rabies in an animal - Imported from outside continental US within past 60 days	Confirmed cases	Immediate, urgent
Rubella	Confirmed cases	Immediate, urgent
Viral hemorrhagic fevers¹ - All cases other than suspected intentional	Confirmed and suspected cases	Immediate, urgent
Yellow Fever	Confirmed and probable cases	Immediate, urgent
Anaplasmosis	Confirmed and probable cases	Standard
Arboviral disease² (Calif. Serogroup, EEE, Powassan, SLE, WEE, WNV)	Confirmed and probable cases	Standard
Babesiosis	Confirmed and probable cases	Standard
Botulism - Infant, sporadic cases - Wound, sporadic cases	All cases prior to classification	Standard
Brucellosis - Cases not temporally/spatially clustered	Confirmed and probable cases	Standard
Cancer	Confirmed cases ³	Standard
Chancroid	Confirmed and probable cases	Standard
<i>Chlamydia trachomatis</i> infection	Confirmed cases	Standard
Coccidioidomycosis	Confirmed cases	Standard
Cryptosporidiosis	Confirmed and probable cases	Standard
Cyclosporiasis	Confirmed and probable cases	Standard
Dengue virus infections	Confirmed, probable, and suspect cases	Standard
Ehrlichiosis	Confirmed and probable cases	Standard
<i>Escherichia coli</i>, Shiga toxin-producing (STEC)	Confirmed and probable cases	Standard
Foodborne disease outbreaks	Confirmed outbreaks ⁴	Standard
Giardiasis	Confirmed and probable cases	Standard
Gonorrhea	Confirmed and probable cases	Standard
<i>Haemophilus influenzae</i>, invasive disease	All cases prior to classification	Standard
Hansen's disease	Confirmed cases	Standard
Hantavirus pulmonary syndrome	Confirmed cases	Standard
Hemolytic uremic syndrome, post-diarrheal	Confirmed and probable cases	Standard
Hepatitis A, acute	Confirmed cases	Standard
Hepatitis B, acute	Confirmed cases	Standard
Hepatitis B, chronic	Confirmed and probable cases	Standard

Hepatitis B, perinatal infection	Confirmed cases	Standard
Hepatitis C, acute	Confirmed cases	Standard
Hepatitis C, chronic	Confirmed and probable cases	Standard
HIV infection	Confirmed cases of HIV infection; perinatally exposed infants prior to classification	Standard
Influenza-associated mortality, pediatric	Confirmed cases	Standard
Lead, exposure screening test result	All test results ⁵	Standard
Legionellosis	Confirmed and suspected cases	Standard
Listeriosis	Confirmed and probable cases	Standard
Lyme disease	Confirmed, probable, and suspect cases	Standard
Malaria	Confirmed and suspected cases	Standard
Meningococcal disease (<i>Neisseria meningitidis</i>)	Confirmed and probable cases	Standard
Mumps	Confirmed and probable cases	Standard
Pertussis	All cases prior to classification	Standard
Pesticide-related illness, acute	Definite, probable, possible, and suspicious cases	Standard
Plague - All cases not suspected to be intentional	All cases prior to classification	Standard
Psittacosis	Confirmed and probable cases	Standard
Q Fever	Confirmed and probable cases	Standard
Rabies in an animal - Animal not imported within past 60 days	Confirmed cases	Standard
Rickettsiosis, Spotted Fever	Confirmed and probable cases	Standard
Rubella, congenital syndrome	Confirmed cases	Standard
Salmonellosis	Confirmed and probable cases	Standard
Shigellosis	Confirmed and probable cases	Standard
Silicosis	Confirmed cases	Standard
<i>Staphylococcus aureus</i> infection - Vancomycin-intermediate (VISA) - Vancomycin-resistant (VRSA)	Confirmed cases	Standard
<i>Streptococcus pneumoniae</i>, invasive disease (IPD)	Confirmed cases	Standard
Streptococcal toxic shock syndrome (STSS)	Confirmed and probable cases	Standard
Syphilis	Confirmed and probable cases	Standard
Tetanus	All cases prior to classification	Standard
Toxic shock syndrome (non-Strep)	Confirmed and probable cases	Standard
Trichinellosis (Trichinosis)	All cases prior to classification	Standard
Tuberculosis	Confirmed cases	Standard

Tularemia - All cases other than suspected intentional release	Confirmed and probable cases	Standard
Typhoid fever	Confirmed and probable cases	Standard
Varicella	Confirmed and probable cases	Standard
<i>Vibrio cholerae</i> infection (cholera)*	Confirmed cases	Standard
Vibriosis	Confirmed and probable cases	Standard
Waterborne disease outbreaks	All outbreaks ⁴	Standard

Source: CSTE Official List of Nationally Notifiable Conditions, November 2010

¹Viral hemorrhagic fever diseases: Ebola, Marburg, Lassa, Lujo, new world Arenaviruses, or Crimean-Congo

²Arboviral diseases: California serogroup virus disease, Eastern equine encephalitis virus disease, Powassan virus disease, St. Louis encephalitis virus disease, Western equine encephalitis virus disease, West Nile virus disease

³Notification for all confirmed cases of cancers should be made at least annually

⁴Outbreaks are defined by state and local health departments, all situations deemed by a local or state health department to be an outbreak are notifiable

⁵Notification for lead exposure screening results should be submitted quarterly for children and twice a year for adults
